PROJECTS:

- **SMART PLANT HEALTH MONITORING SYSTEM:**

This project assists farmers and plant lovers in monitoring the health of plants using a digital system that measures temperature, humidity, light intensity, and soil moisture levels in real time. This system allows for constant monitoring of the environment and notifications based on sensor data.The system acquires data from sensors and displays it using a simple interface, allowing users to make decisions regarding watering, lighting, and plant care.

- **E-COMMERCE WEBSITE:**

I developed an E-commerce website named Pooja's Exclusive Store using HTML, CSS, and JavaScript with a clean and responsive design. The site includes product categories, shopping images, and add-to-cart functionality to give users a real shopping experience. It also offers a user-friendly interface with well-structured pages such as Home, About, Profile, Contact, and Cart, ensuring smooth navigation and easy interaction for users.
